Cleaning & Maintenance of Drainage Line, Sewage Pipeline Networks

We offer Enzyme based treatment for the cleaning of sewer

Where it can be used:

- ➔ Urban Drainage line of Municipalities/Nagarpalika
- ➔ Individual Housing colonies
- ➔ Septic Tanks
- ➔ Canteens
- ➔ Hotels, restaurant Kitchens, Hotels
- ➔ Mega kitchens of temples
- ➔ Educational Institutes
- ➔ Public Utilities

Sewage Treatment Plant

We design, fabricate, install and operate the sewage treatment plant and maintenance work for

- ➔ Urban Drainage line of Municipalities/Nagarpalika
- ➔ Individual Housing Colonies

Effluent Treatment Plants For Industries

Our Foucs:

- ➔ Improving overall plant economics
- ➔ Optimizing equipment efficiency
- ➔ Addressing compliance issues
- ➔ Increasing operator capabilities and effectiveness
- ➔ Providing Labor contract to the company

We design, fabricate and install all types of Air Pollution Control Devices

We are providing Bio Gas plant for community and individual in urban and rural sector

We undertake Annual Operation and Maintenance job work and labor work for STPs of Municipalities and individuals and also in industries.

Reed Bed System (Constructed Wetland)

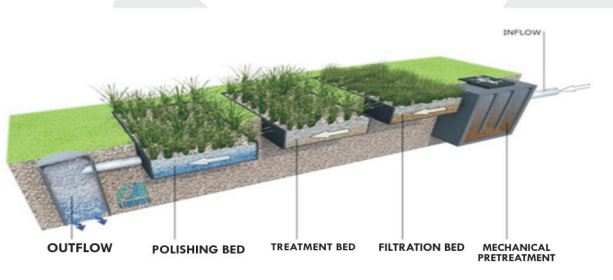

We design, developed and installed this system for the treatment of waste water in housing societies, villages, industries and for all....

This technology is Biotechnology that uses roots of plants for treating waste water at very economic cost.

Salient Features :

- No complicated design & operation
- No electricity wastage
- No costly equipment
- NO moving parts
- No need of highly trained manpower
- Easy to operate and maintain
- Self rejuvenate ecosystem
- Can be installed in parks and jogging tracks

"Yes, You Can Actually Walk On Your Waste Water Treatment Plant"

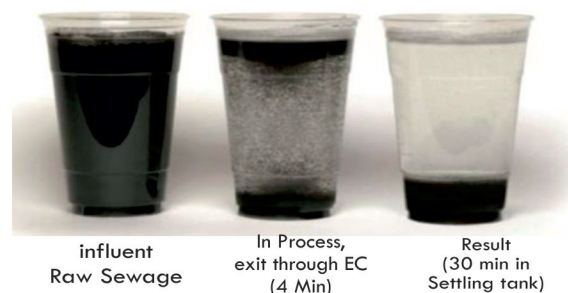

ElectroCoagulation System (EC)

One of the most affordable and proficient water treatment process around the world...
It's a water treatment process whereby electric field is applied across plates to remove contaminants.....

- ➔ Chemical Free, Non Biological
- ➔ Removal of Color 95 %, BOD 85%, COD 80%
- ➔ Simple and easy to operate
- ➔ Noise less operation
- ➔ Very less foot print
- ➔ Low CAPEX & OPEX

Where Can be Used :

- Industrial waste water
- Colonies and towns
- Hospitals
- Commercial complexes

About Us:

The word “पवित्र” is refinement of the word “Swacch” that means pure, pristine, clear or lucid. Solid waste and Liquid waste is ubiquitous and comprises of waste materials that are produced by Households, commercial and industrial establishments that have no value to the owner. Thus waste is the resource at the wrong place.

We, at the “पवित्र” believe that Waste Management is a mission to maximize resource value, while minimizing - and even eliminating - environmental impact so that both our economy and our environment can thrive. We believe that it is our duty and responsibility to protect the environment and leave it for the future generations in better shape than we were given. So we care about the planet.

Our Products

- Waste Water Treatment (Sewage/Industrial)
- Reed Bed System (Constructed Wetland)
- Electrocoagulation System
- Enzyme Based Treatment
- Air Pollution Control Measurement
- Bio Gas System
